

SOFTWARE REQUIREMENTS SPECIFICATION

Project: Student Grade Calculator

Version: 1.0

1. INTRODUCTION

The Student Grade Calculator is a command-line application that determines a student's grade based on their numerical mark.

2. FUNCTIONAL REQUIREMENTS

FR-001:

The system shall accept one integer representing a student's mark.

FR-002:

The mark shall be between 0 and 100 inclusive.

FR-003:

The system shall return grade A when the mark is between 90 and 100 inclusive.

FR-004:

The system shall return grade B when the mark is between 80 and 89 inclusive.

FR-005:

The system shall return grade C when the mark is between

70 and 79 inclusive.

FR-006:

The system shall return grade D when the mark is between 60 and 69 inclusive.

FR-007:

The system shall return grade F when the mark is between 0 and 59 inclusive.

FR-008:

The system shall return "Invalid mark" when the input is less than 0 or greater than 100.

3. INPUT REQUIREMENTS

The input shall be a single integer.

4. OUTPUT REQUIREMENTS

The system shall output exactly one of the following:

A

B

C

D

F

Invalid mark

5. EXAMPLES

Input:

95

Expected Output:

A

Input:

75

Expected Output:

C

Input:

45

Expected Output:

F
